Mode 01	1.Environment Mapping	2.Fire Detection	3.Fire Suppression
Mode 02	1.Tunnel Mapping	2.Hazard Detection	3.Safety Assessment

Two scenarios: indoor fire & tunnel hazard,
realizing environment scanning, risk detection and emergency response step by step.

01

3D Printed Prototype

The physical prototype is 3D printed to verify the shape, size and wearing fit of the wearable device.

01

Project Competition

Presented the wearable device prototype in the contest. The project won the national silver award through offline defense.
